Ingersoll Rand to receive a Global Media Award from the SEMA Show

ANNANDALE, N.J. — November 4, 2010 — Ingersoll Rand, a global leader in vehicle service tools and equipment, has received a Global Media Award from the SEMA Show's panel of international judges for the introduction of the 2015MAX and 2025MAX Hammerhead low-profile Impacttools™.

The SEMA Global Media Awards Program recognizes the premier automotive accessories at their annual trade event. They bring together journalists from throughout the world to the SEMA Show to identify and discover what new products are likely to succeed in their home countries. The Hammerhead was chosen from over 2,000 new products that were introduced at the SEMA Show during the Automotive Aftermarket Industry Week in Las Vegas.

The Ingersoll Rand 2015MAX and 2025MAX Hammerhead low-profile Impacttools are designed for optimal performance, even in extremely confined spaces. The Hammerhead also features a conveniently located forward/reverse collar, providing unrestricted access to easily change the direction of the tool in tight spaces, where traditional tools frequently get jammed. Knuckle-saver reactionless torque eliminates kickback, and further protects technicians' hands while working in confined spaces.
