

Press Release

Ingersoll Rand to receive a Top 20 Tools award from Motor magazine for the 2015MAX and 2025MAX Hammerhead low-profile Impacttools

ANNANDALE, N.J. — September 10, 2010 — Ingersoll Rand, a global leader in vehicle service tools and equipment, has received a Top 20 Tools award from Motor magazine for the 2015MAX and 2025MAX Hammerhead low-profile Impacttools™.

The Top 20 Tools award recognizes manufacturers who create a new tool that helps technicians diagnose and repair vehicles correctly the first time. Products entered must be intended for use primarily on cars and light trucks by professional technicians and the product must also be unique in the industry. The Hammerhead will be announced in the September 2010 issue of Motor magazine and the award will be presented during the Automotive Aftermarket Industry Week in November, in Las Vegas.

“Ingersoll Rand is proud to be named a ‘Top 20 Tool’ in 2010, but more importantly we are thrilled that technicians are using the Hammerhead tools to complete jobs quicker and more profitably,” said Kevin Stamets, business manager for strategic channels with Ingersoll Rand. “The Hammerhead is the ideal tool for technicians who need access in tight spaces without losing power or control.”

The Ingersoll Rand 2015MAX and 2025MAX Hammerhead low-profile Impacttools are designed for optimal performance, even in extremely confined spaces. The Hammerhead also features a conveniently located forward/reverse collar, providing unrestricted access to easily change the direction of the tool in tight spaces, where traditional tools frequently get jammed. Knuckle-saver reactionless torque eliminates kickback, and further protects technicians’ hands while working in confined spaces.
