

ETT - Expert™ Torque Tester

Ingersoll-Rand is pleased to announce the introduction of its Expert Torque Tester (ETT) line of torque calibration equipment. The newest members of the IR Expert family of products, four ETT models allow quick and

accurate torque verification of fastening tools from 1 to 240 in-lbs (0.1 to 30 Nm). ETT's enhanced features include track and peak modes for standard air clutch tools and pulse tools, compatibility with IR's

TouchSync Asset Management system, and a mounting system that simplifies use in the tool crib, calibration lab, or on the assembly line. Whatever your fastening application, ensure it's done right with the ETT.

Features and Benefits

- Recommended for most hand screwdrivers, wrenches, or power tools
- Ideal for testing output torque of assembly tools in the calibration lab, repair crib, or on the production line
- Six different languages (English, French, German, Italian, Spanish, Swedish) standard on all units
- Nine units of measurement for compatibility with global standards
- Charger is equipped with different adaptors to make it easy to use in most of the world
- Four operation modes: Peak, Click, Impulse and Track modes
- High/Pass/Low LED's
- Auto and manual reset function
- Data transfer function to a PC or Printer via the RS232 port
- Diagnostics keep track of past and future calibration dates and current software release
- 8 hours of battery time under normal use
- Auto power down timer keeps unit charged longer
- Quick-Clamp mounts integrated into housing
- Quick-Disconnect plate available for convenient mounting structure
- Certificate of calibration to National Institute of Standards and Technology (NIST) included with every unit
