

Ingersoll Rand Industrial Technologies provides products, services and solutions that enhance our customers' energy efficiency, productivity and operations. Our diverse and innovative products range from complete compressed air systems, tools and pumps to material and fluid handling systems. We also enhance productivity through solutions created by Club Car®, the global leader in golf and utility vehicles for businesses and individuals.

Ingersoll Rand compressors are not designed, intended or approved for breathing air applications. Ingersoll Rand does not approve specialised equipment for breathing air applications and assumes no responsibility or liability for compressors used for breathing air service.

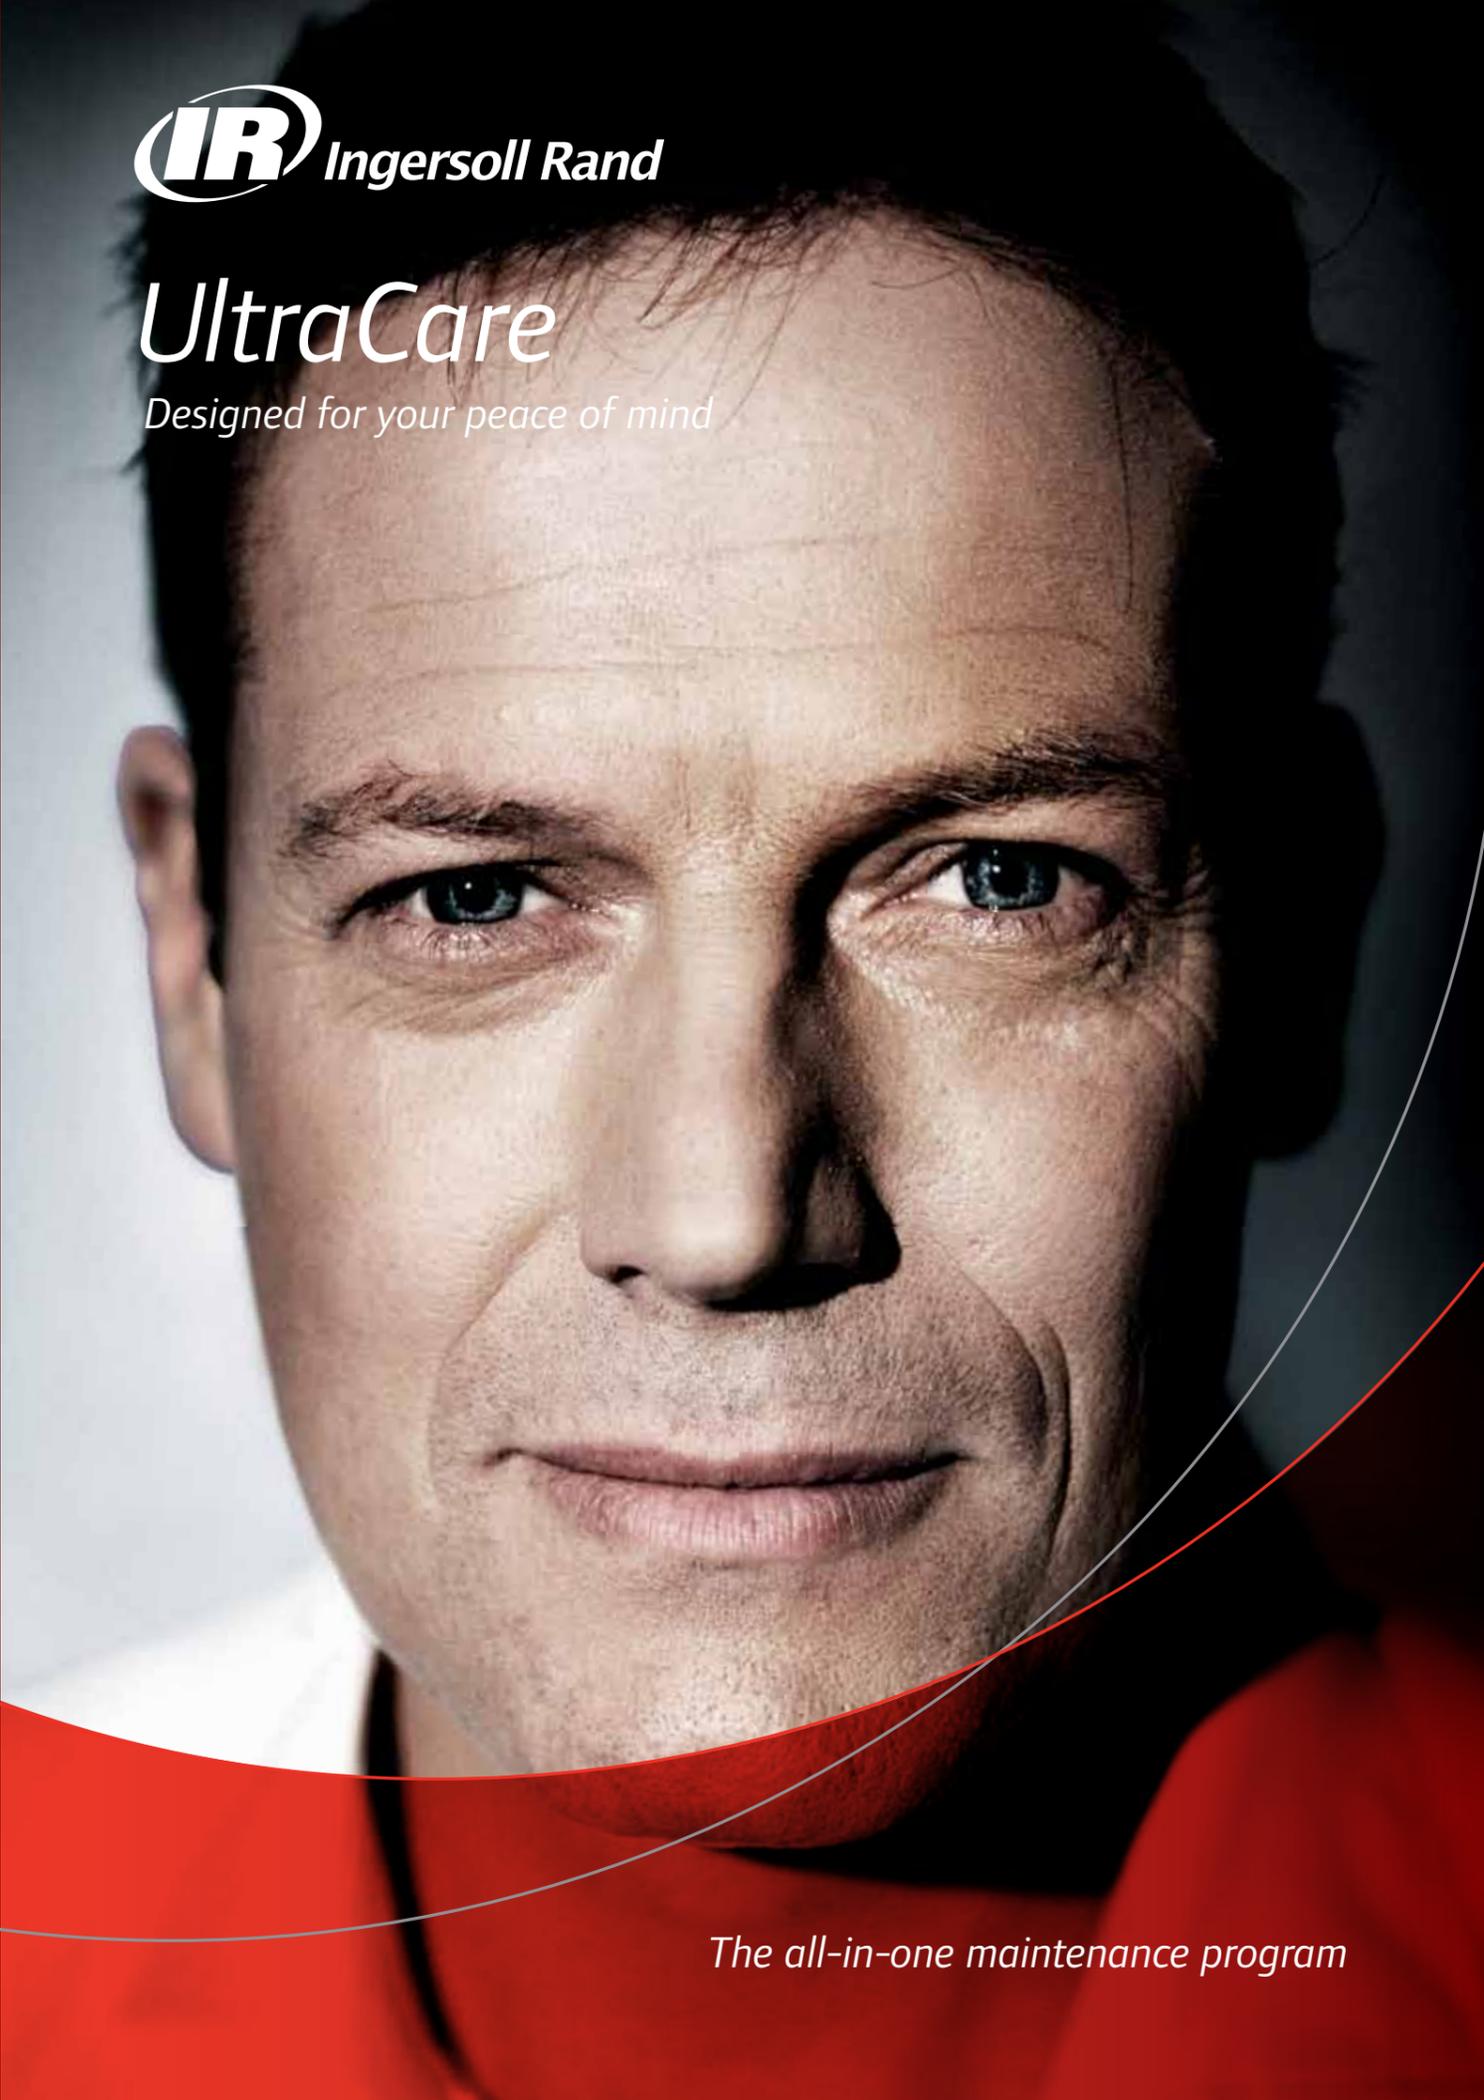

Nothing contained on these pages is intended to extend any warranty or representation, expressed or implied, regarding the product described herein. Any such warranties or other terms and conditions of sale of product shall be in accordance with Ingersoll Rand's standard terms and conditions of sale for such products, which are available upon request.

Product improvement is a continuing goal at Ingersoll Rand. Designs and specifications are subject to change without notice or obligation.

# UltraCare

*Designed for your peace of mind*

*The all-in-one maintenance program*

**one price covers all  
energy savings  
through efficient operation  
minimized risk of breakdown  
fixed costs over five years  
extendable contract**

# ULTRACARE

## DESIGNED FOR YOUR PEACE OF MIND

To keep your systems running at maximum efficiency 24 hours a day, 7 days a week, Ingersoll Rand designed UltraCare, a five-year all-in-one maintenance program for rotary and centrifugal compressors and air dryers. A fixed fee covers all costs. There are no hidden extras.

 **ONE ANNUAL PAYMENT, ONE FIXED PRICE  
EVERYTHING IS COVERED**

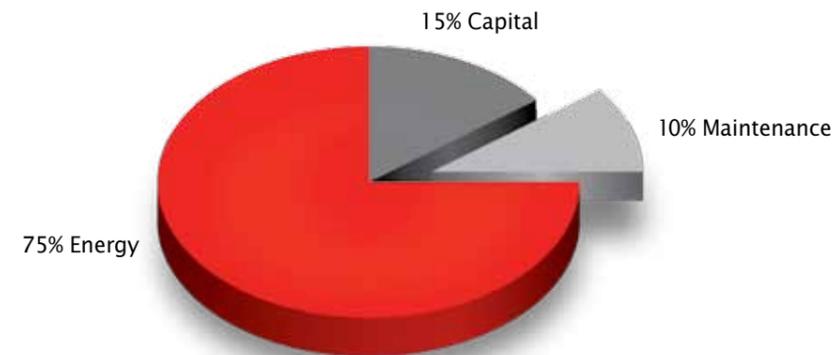

Once you sign up, you will receive one invoice at the start of each year. This fixed annual fee covers regular maintenance by authorized Ingersoll Rand service providers as well as spare parts, consumables, lubricants and emergency breakdown service. This way, you know exactly what you are going to spend during the next five years and there are no surprises.

 **OPTIMAL EFFICIENCY, MAXIMUM RELIABILITY...  
MINIMIZED RISK**

All compressed air systems require periodic maintenance in order to operate reliably and regular maintenance is the cornerstone of UltraCare.

In addition to delivering the required maintenance, UltraCare increases your peace of mind by providing improved energy efficiency and increased reliability.

Electricity consumption is the largest portion of the operating cost of a compressed air system. UltraCare ensures that filters and fluids are kept in an optimal condition so that there are no efficiency losses in your compressed air system.

**INVESTMENT DURING THE PAST 20 YEARS\***

A two or three percent loss in efficiency in a 75 kW compressor can cost you over 2000 euros annually. UltraCare ensures that your compressed air system is always operating at **Optimal Efficiency**.

The other hidden cost of running a compressed air system is unforeseen interruptions in the air supply. Losing your compressed air supply can lead to hours of lost production which, of course, can generate thousands of euros of lost revenue. In many factories, an hour of production is worth far more than the air compressor.

UltraCare ensures that your compressed air system is maintained in accordance with the manufacturer's specification and within the manufacturer's schedule. The responsibility of scheduling and executing the maintenance is assumed by Ingersoll Rand. This drastically reduces the possibility of unforeseen stoppages and ensures the uptime of your facility.

UltraCare delivers **Maximum Reliability and Minimized Risk**.

 **AND BEYOND**

Your first sign-up will be for 5 years, but it does not have to end there. You can choose to extend your UltraCare contract at the end of each 5-year period.

## GIVE YOURSELF PEACE OF MIND

Sounds interesting? Visit [www.ingersollrandproducts.com/ultracare](http://www.ingersollrandproducts.com/ultracare) or contact your Ingersoll Rand distributor. Sign-up to UltraCare today for your peace of mind - your system is in good hands.

\*Example of a calculation based on the power of a compressor x cost in €/kWh x the number of hours, cost of the compressor and maintenance costs. Actual numbers will vary according to the cost of energy in the specific country, the type of compressor, the number of hours per year the compressor is running, the life time of the compressor and whether the warranty is extended or not.
