The MAESTRO Universal is the standard control system selected for new TURBO-AIR compressor builds. It is a microprocessor-based system with many unique, energy-saving features.

**Features**

Control systems can be locally mounted on the compressor skid, designed with local I/O and remote processors, or any other customer-defined arrangement.

Custom PLC systems are fully tested by our Control Engineering Department prior to shipment.

Control system enclosures are available for non-hazardous and hazardous environments, including ATEX Zone 2.
